

Rolleston Quarry

Community Liaison Group Meeting

Held at the Rolleston Quarry - Wards Road

Thursday 12 December 2013

Present: Murray Francis (Road Metals), Jonny Francis (Road Metals), Wendy Gallagher (SDC), Andy Barbati (ECan), Melissa Shearer (ECan), Mark Alexander, Martin Crow, Clayton Fairbairn.

Apologies: Simon Lock

Meeting commenced at 7:30 pm.

As Simon was absent, it was agreed that Mark would chair the meeting.

Minutes from the previous meeting were confirmed as true and correct.

A landscaping company had been to have a look at the bund regarding planting and had advised that planting should be undertaken in April as this would give the plants the best chance.

The bund on Martin's property would be grassed in April.

Andy gave the group an update on the dust monitoring results up to the end of November. Andy confirmed that the results showed full compliance with consent conditions. Andy clarified that any dust complaints that were caused by dust from the road or from the truck (i.e. once the truck has left the quarry) were not able to be dealt with by ECan.

Andy introduced Melissa to the group who would be taking over from Andy for compliance monitoring of the quarry and attendance at CLG Meetings.

Murray confirmed that there was one day when the processing plant was shut down due to concerns about potential dust.

Jonny gave the group an update on the quarry operations. Three water monitoring bores had been installed recently. The internal road to the weighbridge was scheduled to be sealed in January. All extraction was below ground. A new portable crusher had been installed in the pit and this processing plant was quieter than the previous mobile crusher that was on site.

The next meeting would be held on site at the Rolleston Quarry on Wards Rd on February 27th at 7:30 pm.

Meeting declared closed at 8:15 pm.
