

Yaldhurst Quarry – RM4

Community Liaison Group Meeting

Held at the Yaldhurst Quarry – West Coast Road

Wednesday 25 March 2026

Present: Kevin Crews, Lindsay Forbes (Road Metals).

Apologies: Soraya Nicholas (Chair), Maria White (CCC), Tess Hindle-Daniels (ECan),
Jonny Francis (Road Metals).

Meeting commenced at 4:00 pm.

Lindsay explained that the gravel extraction for RM4 has been completed apart from a safety zone on the northern boundary required prior to starting the RM5 consent.

Rehabilitation of RM4 is still underway with a completion date (depending on weather conditions) September 2026.

CCC and ECan had not reported any issues to be discussed.

Kevin Crews mentioned a strong wind event that created dust at his property at 120 Old West Coast Road on the 9th January 2026. Lindsay retrieved the Data from the Dust Monitor to review the event.

Time: 11.0am

PM10: 8.63ug/m3

Wind Speed: 7.38m/s

Wind Direction: 167 degree – South East direction.

Lindsay explained that this CLG meeting would be the last for the RM4 consent as it is intended to have the rehabilitation completed later this year.

Kevin thought an invitation to the group to visit the RM4 site when rehabilitation was completed would be a good idea to see the end result.

Lindsay indicated notification will be extended to neighbouring properties to form the RM5 CLG prior to activating the consent.

No more issues to be discussed

Meeting declared closed 4.25pm
